Forestry TEP

*One-stop shop for forestry remote sensing services
for the academic, public and commercial sectors*

- Online service that enables quicker and smoother value adding
- Access to satellite imagery, computing power and value adding services
- Platform for developing and sharing own applications
- Worldwide marketing channel for commercial remote sensing services

Forestry TEP Overall concept

Forestry TEP as a project

- Initiative by the European Space Agency
- One of the six Thematic Exploitation Platforms
- In 2018 transitioning to operational services

Prime Contractor

Subcontractors

Science & Technology Facilities Council
Rutherford Appleton Laboratory

Infrastructure provider and
data mediator until 2018:

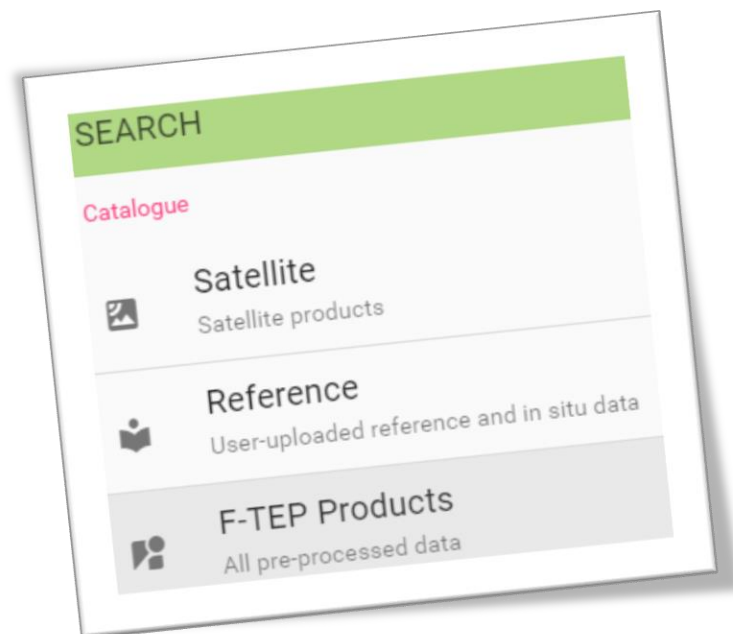

User segments

User group	Characteristics
Academia	Many and diverse users Central role in outreach Expect free or very inexpensive services
Governments	Can be massive users Ready to pay for good services
Forest industry, large forest owners	Require very specific services Potentially a major customer segment
NGO's	Important role in outreach Expect inexpensive services
Value adding service provision companies	Particularly SME's Major customer segment
Intergovernmental organizations	Potentially major customer segment via donor funding

Forestry TEP data offering

- Primary data: **Sentinel** satellites of the European Copernicus programme
- Additional satellite data sources
 - Landsat (currently limited)
 - Forthcoming: commercial satellites
- Reference data
 - As produced and shared by users
- Computed products
 - As produced and shared by users

Sentinel-1

- **C-band synthetic aperture radar (SAR)**
- Two polar-orbiting satellites (1A, 1B)
- 5-day global coverage
- Benefits: operation day and night, weather-tolerant
- Main uses: sea ice, marine surveillance, ship detection, land-surface motion, forest/water/soil, humanitarian/crisis
- Modes: Interferometric Wide Swath (IW), Extra Wide Swath (EW), Wave (WV), Stripmap (SM)
- Polarisations: HH, VV, VV+VH, HH+HV
- Primary data types (Level-1):
 - Single Look Complex (SLC): 4-8 GB
 - Ground Range Detected (GRD): 1 GB

Sentinel-2

- **Optical MultiSpectral Instrument (MSI)**
- 13 spectral bands
 - 500 nm to 2200 nm
- Resolution 10 to 60 m
- Two polar-orbiting satellites (2A, 2B)
- Main uses: climate change, land monitoring, emergency management, and security.

Processing services

- Several services take user-provided reference data
- Download or share the results

WORKSPACE

VegetationIndices

Calculate a variety of radiometric indices for vegetation

Radiometric indices for single-tile Sentinel-2 images, provided by Orfeo Toolbox. A core F-TEP service.

Input data *

sentinel2:///S2A_MSIL1C_20170710T100031_N0205_0170710T100540

Processing services by users

- Users can bring their own methods and turn them to new processing services on the platform
 - for themselves to use privately
 - or shared to colleagues / a project group -- or to all
- Based on Docker and shell script - templates provided
- *Note: request for the needed account role!*

Service Name *	Docker Tag	Title

Pilots in Mexico and Finland

Mexico: Forest cover mapping over the states of Chiapas and Durango → carbon monitoring

Finland: Mapping of harmful broadleaved shrubs in regeneration areas

Land cover mapping example

- 9 classes
- 625 km²

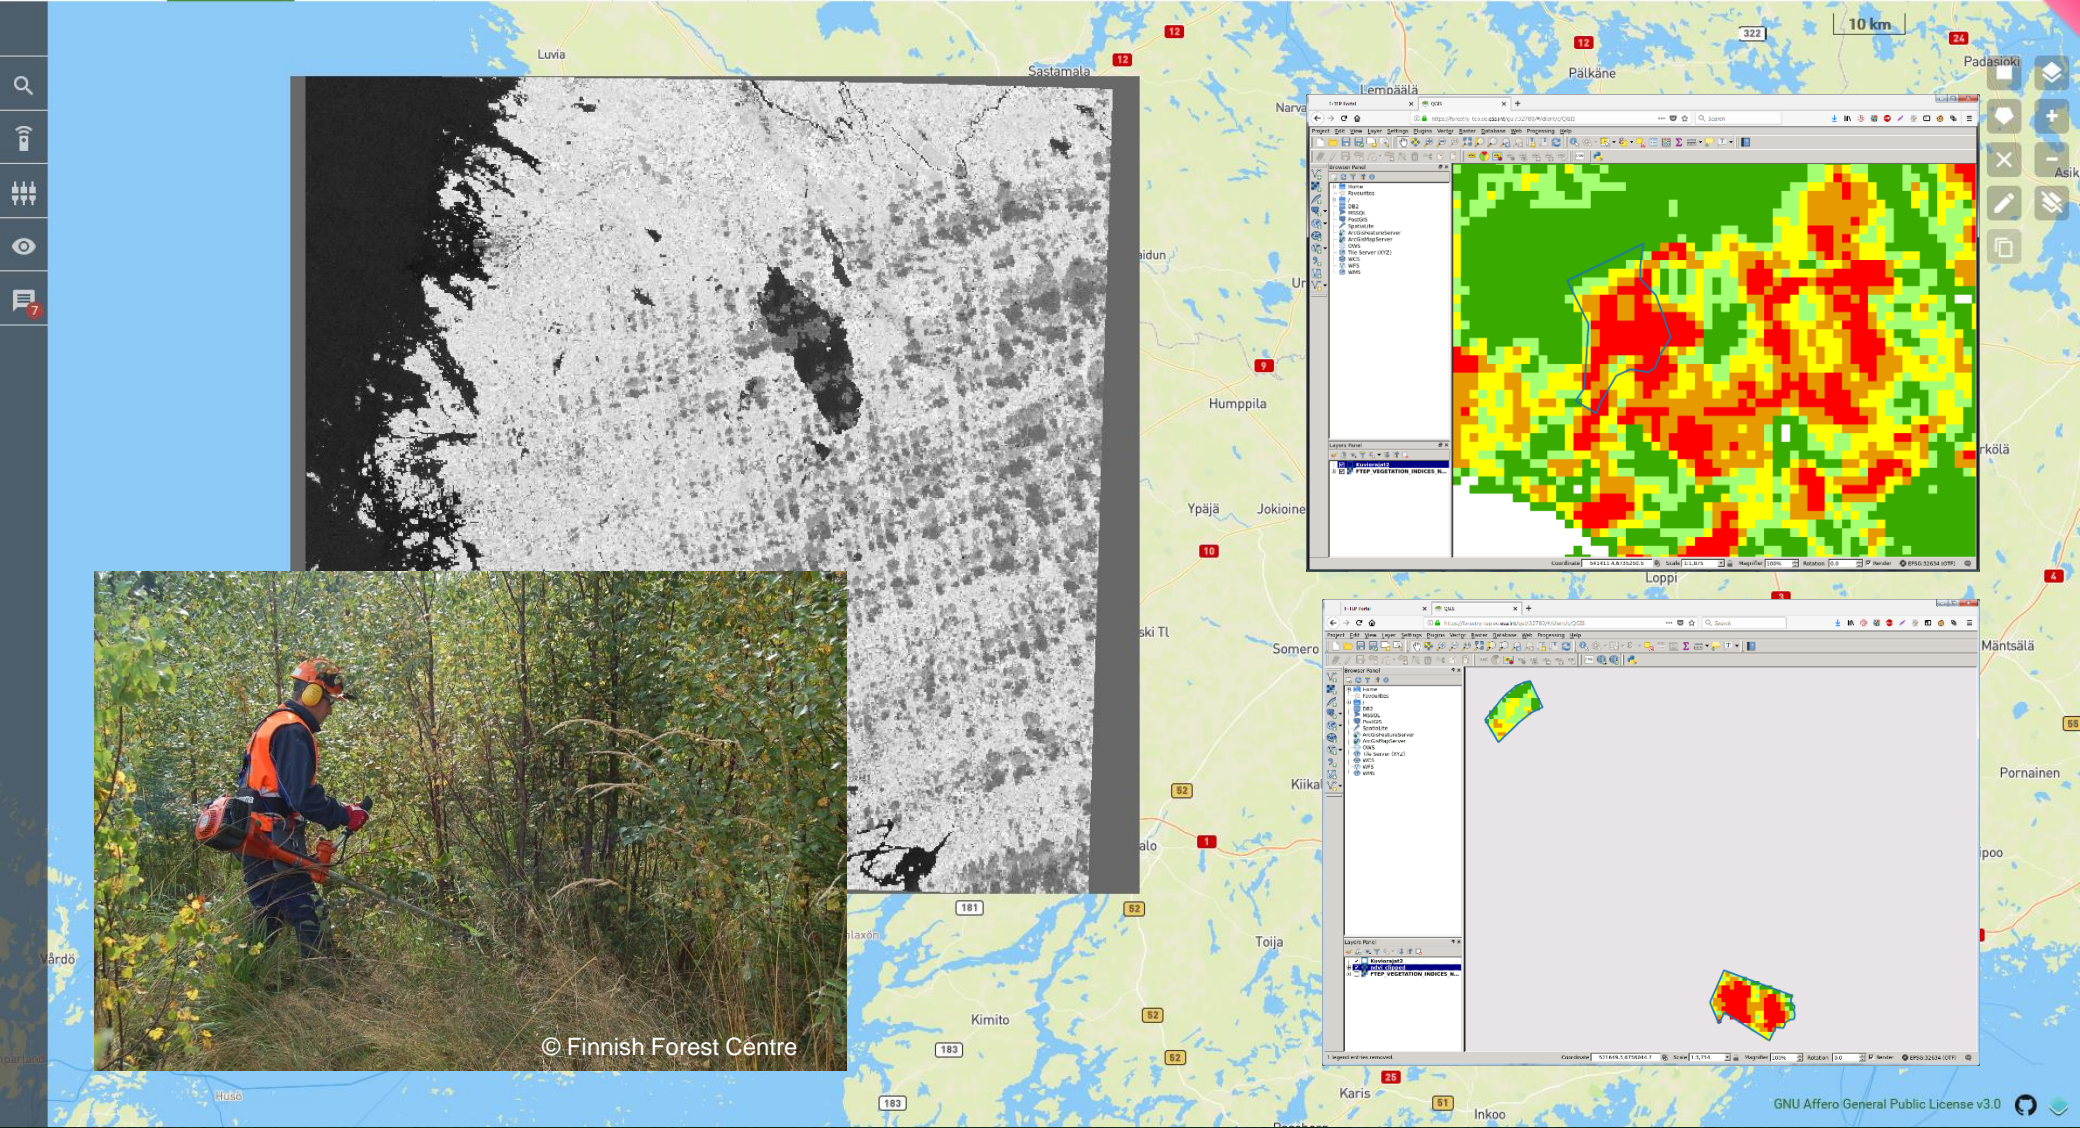

Sentinel-2 data in Durango

- A mosaic of 18 granules (from 27 March 2017)
- Covers almost the whole state without clouds

Detail: shrub abundance map with stand borders on two regeneration areas in Finland

Forestry TEP in 2018

- Currently ~150 users
- User on-boarding continuing
 - Further user trainings: introductory and advanced
- Development
 - VTT and 3rd party services, evolution services
 - Improvements in stability and features
 - User interface development
- Towards operational services
 - Long-term data, infra and governance arrangement
 - Inclusion of commercial data

Join the user community!

- Follow the instructions on <https://forestry-tep.eo.esa.int/>, register, and try it out
- Contact us: forestry-tep@esa.int
- Follow the website and @forestry_tep
- *Consider us also as a partner for H2020*
